Bareground Solutions

Easy, efficient
and effective.

Innovative solutions to help improve productivity.

Our science-based solutions were designed to keep bareground sites free from weeds. These conditions promote safety, providing a clear line of sight for safe operations and visibility, as well as reducing fire hazards. Land Stewardship is also important. Protecting open areas from invasive or exotic plants prevents their establishment, proliferation, and spread, assuring these species will not move to adjacent farms, forests, and natural areas. If you want the job done right, start with the right products.

The new standard for bareground.

// Esplanade® 200 SC + // Method® 240SL

Fewer retreats, increased productivity, less storage, greater profits.

- // Foundation products for the ultimate bareground program
- // Both actives assist with resistance management
- // Target tough species like kochia, maretail, pigweed and crabgrass

Concentrated liquid formulations are easy to measure, mix and store

// Esplanade 200 SC

Low use rate, season-long control.

- // Ounces replace pounds of previous bareground products containing diuron
- // Tank-mix and custom blend flexibility
- // Odorless and non-staining

Pre-emergent herbicide controls over 74 weed species

// Method 240SL

Apply as a pre- and post-emergent for long residual control of broadleaf weeds under harsh environmental conditions.

- // Effective on many difficult-to-control broadleaf weeds
- // Low use rate of 18 fl. oz. or less per acre
- // Odorless and non-staining

Now available in 2.5 gallon pack size

Tank-mix products to bridge control for unpredictable conditions and difficult environments.

// Oust® XP

Economical performance insurance.

- // Low use rate; only ounces per acre
- // XP formulation assures product mixes completely for consistent results and uniform spray coverage
- // Reliable industry standard tank-mix partner for decades
- // Bridges gap between application and activation of pre-emergent herbicides

See effects in 2-3 weeks

// Oust EXTRA

All the benefits of Oust XP with the “extra” benefits of Escort® XP herbicide.

- // Adds Rubus (blackberry, dewberry) control
- // Increases broadleaf weed control spectrum
- // Flexible pre- and post-application window

Best value of any tank-mix partner ounce for ounce

Rotation products for resistance management, perennial grass encroachment, as well as specific vegetation targets.

// Viewpoint®

Convenient packaging, broad-spectrum.

- // Dry formulation reduces packaging and disposal
- // Best choice where vines are problematic
- // Controls hardwood brush species that may have germinated on site
- // Esplanade 200 SC and/or Oust XP are common tank-mix partners

Controls broadleaf weeds, grasses, vines and woody plants

// Esplanade EZ

Great around established trees and shrubs.

- // Non-selective post- and pre-emergent weed and grass control
- // “One and done” solution replaces multiple applications of straight glyphosate
- // Beats other glyphosate products formulated with less effective residual herbicides
- // Concentrated formulation for easy mixing and backpack applications

Use around parking lots, sidewalks, around buildings, gravel areas, fence rows, mulched areas and more

Science for a **better life**

Bayer is an innovative company with a long tradition of investing in the latest innovations, technical expertise and business-building tools. By applying science to major global challenges, we can work together to help create healthier spaces for people where they live, work and play. It's science for a better life.
