Apply in late summer to early fall prior to 25.5" growth of annual weeds. For best results, water-in the product as soon as practical after application.

**Ronstar G Herbicide** controls weeds by killing the weed seedlings as they come in contact with the herbicide during germination.

- **Residential Landscape Ornamentals:** The maximum number of applications that may be made per year are two. The maximum single application rate is 4.0 pounds of active ingredient per acre.
- **In Turfgrass and Ornamentals Including Landscape Ornamental Beds on Residential Properties:** The maximum number of applications that may be made per year are two. The maximum single application rate is 2-1/4 to 4-1/2 lbs per 1000 SQ FT.

**Restrictions:**
- Do not apply more than 4 pounds of active ingredient per acre per application.
- Do not apply to Dichondra or Centipede Grass.
- Do not apply to Tropic Lalo until 0 – 12 days after sprigging.
- When making applications to Tropic Lalo, applications should be made after March or April, and to actively growing or dormant ornamentals. Rainfall or overhead irrigation after application of Ronstar G Herbicide should not be used in areas where irrigation or rainfall results in the direct or expected heavier weed kill.
- Do not apply more than 4 pounds of active ingredient per acre per application.
- Do not apply to Dichondra or Centipede Grass.
- Do not apply to Tropic Lalo until 0 – 12 days after sprigging.
- Do not apply to actively growing or dormant ornamentals. Rainfall or overhead irrigation after application of Ronstar G Herbicide should not be used in areas where irrigation or rainfall results in the direct or expected heavier weed kill.

**Environmental Hazards:**
- This pesticide is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes.
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash exposed skin with soap and water.
- Hold eyes open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present and easily accessible. Continue to rinse eye.
- If swallowed, call 1-800-984-6610 or refer to the Material Safety Data Sheet (MSDS) for further treatment information.

**Waste Management:**
- Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
- It is illegal to use this product in a manner that is inconsistent with its labeling.

**Personal Protective Equipment (PPE):**
- Use protective eyewear, face shield, dust mask, and protective clothing. Use rubber gloves when handling product. Non-slip shoes are recommended.

**Material Safety Data Sheet (MSDS):**
- The Material Safety Data Sheet (MSDS) is available from the manufacturer or supplier of this product.

**Component:**
- (1,1-dimethylethyl)-1,3,4-oxadiazol-2(3H)-one 2.0%

**Net Contents:**
- 50 Pounds

**Produced for:**
- Bayer Crop Science LP

**State or Tribe:**
- Consult the agency responsible for pesticide regulation.

**Not for use on home lawns.**
Apply in late summer to early fall prior to vines, and trees. RONSTAR G Herbicide controls weeds by killing the weed seedlings as they come in contact with the herbicide during germination.

- **Not for use in turfgrass on residential properties:** RONSTAR G Herbicide may be applied to landscape

Restrictions:

- Do not apply to Dichondra or Centipedegrass.
- Do not apply RONSTAR G Herbicide to newly seeded areas.
- Use not permitted in California

**Non-Agricultural Use Requirements**

- Do not apply more than 200 lbs of product (4 pounds of a.i.) per acre per application.
- Do not make more than 2 applications per year.
- Do not apply to Zoysia turf; such as, fairways, parks, golf courses, and lawns.
- Rake turf area free of leaves, mowing if necessary, so granules reach soil surface.
- Measure area to be treated.
- This pesticide is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes.

**User Safety Requirements**

- In case a spill occurs, neutralize with household ammonia or neutralize with lime on contact areas.
- Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.
- Completely empty bag into application equipment. Then dispose of equipment in accordance with local regulations.

**Disclaimer of Warranties:**

- To the extent consistent with Applicable Law, Bayer CropScience LP makes no other warranties, express or implied, regarding this product.
- Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the product.
Apply in late summer to early fall prior to growth of target weeds. Do not apply RONSTAR G Herbicide through any type of irrigation system. For best results, water-in the product as soon as practical after application.

Amount to Use section and at the end of the Weed list box that follows.

- Do NOT APPLY RONSTAR G Herbicide to putting greens or tees because of the varying cultural practices used.
- Do not apply to Dichondra or Centipedegrass.

Expected shortly after application, irrigating the turf thoroughly will increase effectiveness.

For use in established perennial Bluegrass, Bentgrass, Bermudagrass, Buffalograss, Perennial Ryegrass, St. Augustine grass, Seashore Paspalum*, Tall Fescue, and

( plant names)

- Annual Bluegrass
- Axonopus fissifolius
- Oxalis ( spp.)

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers and persons who may be exposed to pesticides by virtue of their presence in treated areas until dust has settled.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

Use the higher rate with areas where there is heavy weed infestation. In areas of heavy weed infestation, the maximum application rate is 400 pounds of product per acre per year.

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL.
