

Marengo®

Program sheet

Marengo® 2020 Spring Program

// Growers receive special pricing and terms on purchases of Marengo and Marengo G

////// Marengo provides up to 8 months of control of difficult weeds and it just keeps getting better...

// 2019 Updates to EPA Labels

// Marengo controls or suppresses 98 weeds, has 267 tolerant plants on the label and is now labeled for over-the-top use on field grown crops

// Marengo G controls or suppresses 98 weeds, has 266 tolerant plants on the label and fewer “do not use” plants”

// In a blind grower study*, Marengo and Marengo G were rated as the highest value preemergence herbicide when compared to 7 other widely used products.

// Up to 8 months of control makes Marengo a very economical preemergence choice. Compare the cost-in-use of Marengo against your current herbicide program at es.bayer.us/marengo-calculator

* 2018 Research – Question asked was “How well do each of the following products perform on providing a good value for the money in your nursery?”

////// Program Details
