3 brands	5%	10%

Program Details

// Eligible Products: Altus, Kontos & Savate

// Qualified purchases must be invoiced in June or July 2021 on a single invoice. Growers can make multiple qualifying purchases.

// Growers must be enrolled in My Bayer Rewards to receive a rebate. Rebate will be paid in the form of My Bayer Rewards points which can be redeemed for checks, agent credit or 1,000's of catalog items.

Contact your Bayer Representative or Agent today. This is an exclusive offer for members of MyBayerRewards. Not a member? Sign up at MyRewards.Cropscience.Bayer.com

*All credits will be issued in the form of My Bayer Rewards (MBR) points. Points can be redeemed for company check, agent credit or 1000's of catalog items. Points will be awarded by Nov. 1, 2021. Qualified purchases will be invoiced from June 1 – July 31, 2021, by authorized Bayer agents. Each invoice will be evaluated individually for program qualification. Invoices will not be combined. Must be an end user with My Bayer Rewards membership and accept current Terms and Conditions.

Altus®

Is a novel insecticide that can be used on a wide range of plants anytime during the production cycle.

- // No application timing restrictions
- // Labeled for use before, during and after plant bloom
- // Low impact on honey bees, bumble bees and many beneficial arthropods
- // Excellent residual control up to 4-6 weeks
- // 4-hour re-entry interval (REI) minimizes business disruption (12-hour REI in CA)

Kontos®

Provides highly effective control of sucking pests with true systemic activity.

- // Foliar or drench control of many sucking pests
- // True systemic movement in the plant xylem and the phloem, protecting existing and new plant tissue
- // Up to 30 days of insect control
- // Ideal tool for use in IPM programs

Savate®

Provides excellent knockdown and residual control of all stages of mites and whiteflies.

- // Effective on all life stages of mites and whiteflies, including eggs and immature stages
- // Mite species controlled include Tetranychid mites, Tarsonemid mites, Tenuipalpid mites and Eriophyid mites
- // Translaminar movement protects upper and lower leaf surfaces
- // Minimal risk for many beneficial insect species when used as directed
- // Up to 30 days of residual control
